Dr. Joshua Burns
(Institute of Neuromuscular
Research, Children's Hospital at
Westmead)

Dr. Burns will appear on video.
He is in the USA carrying out re-
search into CMT under a Fulbright
Postdoctoral Scholarship.

Charcot Marie Tooth is the most
common inherited neuropathy.

As many as 1 in 2500 people in
Australia could have CMT.

CMT causes slow degeneration of
the nerves in the extremities in-
cluding feet, legs, arms & hands.
